# About Us

Abel Patios are a long standing, highly reputable patio company based in Perth. We are immensely passionate about delivering an exceptional customer experience.

## Our Story

The inception of Abel began 19 years ago and our success can be attributed to three core principles:

---

Service

---

Quality

---

Customer Satisfaction

---

As a Stratco Authorised Outback Dealer, we represent a proven, tested and reputable brand name.

## Abel Quality

You will not have subcontractors arrive on site because we don't use them. The installation process is managed by qualified supervisors and a management team obsessed with quality workmanship.

Ever heard the saying "A warranty is only as good the length of time the business has been around"? Well we have that covered too! We have been around longer than all of our warranties, including the Stratco backed 25 year Outback Guarantee.

**We are Abel and we are at your service.**

# Design Options

Choosing a patio is an exciting process. With state-of-the-art design software, ABEL can create a conceptual visualisation of your patio design, ensuring you know exactly what you're getting before it's built.

## Custom Patios

Our design consultants, project supervisors and tradesmen are extensively experienced across a wide range of steel patio designs. Our custom patios are fabricated from RHS patio tube and are perfect for patio designs on a budget. Custom patios & carports manufactured from RHS steel tube provide great flexibility for combination units and non standard design options.

## Stratco Patios

At the top end of the market is the iconic Stratco Outback patio and carport range. The Outback is a flagship patio system providing a genuine long-lasting solution. Roll formed from high tensile, pre painted, high gloss, Colorbond steel, the Outback has a superior design life with a Stratco backed 25 year structural warranty and 8 year paint guarantee.

# Stratco Patios

Stratco patios simply last longer! When compared to welded, powder coated steel tube in the same environment, Stratco Outback patios last years longer, and its proven.

The Stratco Outback Range is roll formed from pre painted, high tensile steel. High tensile steel has a higher carbon content and therefore spans further and weighs less. It has a Zinc, Magnesium and Aluminum coated substrate with an oven baked high gloss paint finish. There is no welded joints and no powder coating of beams. The Outback boasts a 25 year structural warranty & 8 year paint warranty.

From versatile flat roof patios, to enchanting gable designs, the Outback range is available with the iconic ceiling like appearance of Outback deck, classic corrugated sheeting or the eye pleasing insulated Cooldek panel.

Opening roof systems are available as a Stratco Sunroof or the Pavilion Allure. The Stratco opening roof system is unmatched with any other design. With 135 degree louvre opening functions, you dictate how much light, ventilation and weatherproofing you want to achieve.

**Rest assured, there is a Stratco Patio to suit any applications!**

# Flat Roof Patios

Flat patios are simple yet elegant and with the right design expertise can make a signature statement to any outdoor area. They are available as both custom steel patio tube or as an Outback flat patio.

# Gable Patios

Gable Patio designs are a crowd favorite. Gable roof patios are endowed with an open feel that will enrich your home and outdoor area. The pitched roof of a gable patio complements traditional house roofs and adds a sense of spaciousness to covered areas.

## A Versatile Patio Solution

Custom flat patios are made from powder coated steel tube, double sided colour sheeting and architecturally inspired 'edge' gutter.

Flat patios are simple, yet elegant and with the right design expertise can make a signature statement to any outdoor area. Custom options can incorporate boundary columns, roof sheet overhang, reverse skillion designs, flat roof patios on riser brackets and integration with other combination units. Custom flat patio designs are functional and cost effective.

They are available attached to the home or as a freestanding structure so they can be used as a carport, verandah or patio.

## Custom Gable Patio Designs

Our custom gable designs incorporate various truss patterns including heritage style web designs or a more contemporary cranked beam or top rafter set only. Gable patio designs are available with hip ends, pyramid style gazebos, attached or freestanding, with Colorbond roof sheeting or insulated roof panels. The option to infill gable ends with translucent polycarbonate provides additional weatherproofing without compromising light transmission.

## Stratco Outback

The single span Outback sheets offer an extraordinary visual appearance with no purlins from ridge to gutter. Outback gables are available in a variety of designs; from the heritage style 'traditional' carports and Dutch gable to the more modern and contemporary style 'clearspan gables'. Stratco Cooldek panels offer impressive thermal properties and enhance the visual impact of a pitched roof design.

# Dome Patios

The smooth clean lines of a curved roof patio will form a graceful canopy over any outdoor area..

# Pergola Patios

Pergola Patios from Abel Patios Perth create an inviting open-air setting that lets light in and improves the appearance of your home. They provide shade and protect recreation areas and delicate plants.

## Stratco Curved Patios

With increased height clearance and fewer 'nooks and crannies' than a gable design, dome patios are as practical as they are eye pleasing.

A domed design is available with corrugated sheet or Outback deck roof sheeting. Light and airy polycarbonate sheets are available length ways or spring curved around the radiused rafters.

The option to infill each end with translucent polycarbonate provides additional weatherproofing without compromising light transmission.

## Pergola Designs

Pergola designs are available with overlapping shade blades to provide a satisfactory level of weatherproofing, whilst allowing natural light and ventilation to flow through.

Shade cloth can be tightly fitted over the rafters for a more permeable roof cover whilst providing additional sun protection, perfect for gardens and children's play areas.

For a purely visual effect, pergola beams are available with overhanging profiled beam ends for a real touch of class.

As part of our modern pergola range, we can install translucent polycarbonate multiwall sheeting over the pergola rafters to provide complete weatherproofing whilst preserving the natural light and airy atmosphere of a pergola.

# Louvre and Sunroof Patios

For a patio with full weather control, you can't look past our operable roof systems.

## Louvre Sunroofs

Sunroof Patios are ideal for mixed use areas, allowing full or partial sunlight in to an area and can be completely closed to keep the rain at bay.

Sunroof Patios from Abel Patios Perth let you take control of the weather with electronically controlled louvres that open and close to your desired position. This allows the breeze and sunlight in when the weather is fine and provides protection when the clouds set in.

Operable louvre roofs are available as part of the Stratco Outback range or the more prominent Stratco Allure system. Allure uses the same louvres and working parts as the Stratco sunroof, however is encapsulated in an all-aluminum sizeable frame, internal gutters and 100mm crisp columns. Allure is warranted for 15 years up to 100 metres from breaking surf and also has a 10 year paint guarantee.

# Why Choose Abel Patios

## Our installers are employees, not outsourced contractors

All our installers hold the necessary licenses and are all Abel employees. This means each installer is accountable for each job.

## We have outlived all of our warranties

We know they last, we stand by them and yes, we definitely honour them

## We are fiercely customer focused and boast 5 star ratings

Expect a follow up phone call or visit from the supervisor to check that you're satisfied.

## We are a long standing Stratco Authorised Outback and Pavilion Dealer

You can be assured of quality with every patio.

## We use state of the art design software to create visuals of each design before submitting a quote

You'll know exactly what you're getting!

## 25 Year Stratco Outback Warranties

We use cold rolled, prepainted, high tensile Colorbond steel backed by a 25 year Stratco Outback structural warranty and 8 year Outback paint finish guarantee.

## We have a dedicated supervisor to manage and oversee each job

You can rest assured that your patio build is in safe hands with Abel Patios.

## We leave each site cleaner than how we found it

We make sure there is no cleaning up needed after Abel installations.

## Registered Builder, means regulated quality assurance
