

Outback Flat Roof

Create a functional outdoor living area that will enhance your home and lifestyle with the smooth, simple, uncluttered lines of the classic Outback Flat Roof. The versatile Outback Flat Roof system can be configured to cover any area around the home. It is ideal as a single unit or incorporated with a gable roof, curved roof, or pergola system.

Available as either a freestanding structure or attached to the home it can be used as a verandah, patio or carport. With the addition of the Outback Rooflite™ you can supply filtered light to the underside. The beams can span up to 8.4 metres and are available in either 120mm or 150mm sizes.

There are four configurations to choose from. Type One has a 4.5 metre maximum span and only requires an outside beam to support the structure, although most units use perimeter beams on all sides to provide the best appearance. Type Two is the same, but with an overhang at the front to increase the covered area to 5.4 metres. Type Three has support beams across the span so the roof sheets can run horizontally for a different appearance. Type Four has extra support beams and a purlin through the middle to give it a span of 8.4 metres.

Uncomplicated by design, the Outback Flat Roof is the ideal do-it-yourself project, with everything supplied as a package and all the assembly instructions provided.
